**Subject:** [Possible VIRUS!] RE: Phosphorus Slag

Not clear to me what Bannock County LF issue would be (TCLP below), assuming that this is slag which Bannock Paving Co. sourced from FMC and has not been mixed with something else. Moreover, if this is a parking lot (?), I don't understand driver to dispose.

**Subject:** Phosphorus Slag

Can anyone give me some direction on the disposal options for approximately 1,000 cubic yards of phosphorus slag that is believed to have originated from the FMC plant, now the FMC Superfund Site? We are interested in purchasing a Pocatello property and need this slag removed prior to completing the acquisition?

IDEQ directed me to the Bannock County Landfill and they decided that they could not accept this waste. We are currently in talks with the land owner regarding the purchase and I need a response ASAP.
